## **OUR SERVICES**

Shivam Construction is a professional engineering company that conducts all aspects of civil engineering projects especially the design, construction and maintenance of the physical and naturally built environment. We aim to improve and protect the environment in which we all live, helping to develop the facilities for the general public as well as for transport and industry. Our objectives are to utilize our many departments and work with our clients to create the best option for their construction needs and to provide a competitive and cost effective solution making sure our clients achieve their programs on time and within budget, utilizing our extensive knowledge and highly trained / skilled workforce.

- Road Constructions
- Drainage systems
- Ground works
- Bulk excavation
- Remediation
- Waste Management
- Waste Treatment
- Foundations
- Commercial and domestic infrastructure

## **ROAD CONSTRUCTION**

In today's age, speed is the norm. Mobility is no exception. Be it to move people or goods, a strong transportation network – roads, highways, bridges, flyovers etc. – paves the way for better connectivity.

Further, the National Highway Development Programme (NHDP) and upgradation of 3,700 kms. of National Highways by way of double/four/six/eight laning will spur more activity in this space.

With a track record of executing large scale contracts within tight schedules, we plan to seize every opportunity to transform road and highway networks across various countries.

## **OUR QUALITY POLICY**

- Road haulage services available
- We consider the safety of the public, our customers and staff is our main priority
- Our cost-effective demolition service is fast, and we have our own demolition equipments
- Our efficient demolition and recycling services are near major transport routes
